

Di Wen

- Birth: 1988
- Location: Shanghai
- Mobile: (86)-18643430095
- E-mail: ifyouseewendy@gmail.com

Skills

- Skilled with *Ruby* language and relevant tech stack.
- Skilled with Web development service and tools, *Linux & Mac OS, iTerm + Tmux + Vim, Git*
- Familiar with front-end development, *HTML, JavaScript, CSS*
- Solid knowledge of data structure and algorithm.
- Solid knowledge of code refactoring, performance optimizing, design patterns, network and OO programming.

Experience

2015.9 ~ 2016.1 - Web Developer, Self-employed

#TechStack: ActiveAdmin, PostgreSQL, MiniTest, Mina, Puma, Nginx ([Github](#))

Work as a contractor to implement an OA system.

- Make complicated function modules, like managing files of corporation and staff, sending salary.
- Participate in a whole development cycle, talking with customers to settle requirements, making system design, coding, testing, and deploying.

2015.1 ~ 2015.7 - Web Developer, [Kaitong AMC](#)

#TechStack: Rails, MongoDB, MiniTest, Mina, Unicorn, Nginx ([Github](#))

Kaitong AMC is an Internet financial startup, aiming to provide a platform between bourses and Internet financial corporations. As the first tech engineer, I've gained much valuable experience from the entrepreneurial endeavor. My job is to

- Make collaborative solutions with bourses and Internet financial corporations.
- Implement a docking platform using Ruby on Rails to automate the cooperation.

2012 ~ 2015 - Web Developer, [Umeng](#), [Alibaba inc.](#)

#TechStack: Rails, MongoDB, Redis, RSpec, RefineryCMS, Resque, Capistrano, Unicorn, Tengine

Umeng Analytics is the leading mobile app analytical platform in China. We implement analysis and statistics Web product using Ruby on Rails, including

- Umeng Mainsite, regular product iteration, fixing online issues, refactoring and optimizing website performance. Tech design and implement an iPad version.
- Admin System, assisting product manager to filter data and make analysis.
- Developer Center, a CMS system for developers to read online documents and download SDK packages.
- API & OAuth, for third-party company to authenticate, authorize, and query data.

2011 ~ 2012 - Web Developer (Intern), [DianPing](#)

#TechStack: Struts, Spring, iBaits

Dianping is the largest group deals site in China. I work as an intern in the Search Group, implementing some backend administer features using Java.

Education

2008 ~ 2012 - Bachelor, Software Engineering, East China Normal University

Project

- [rmb](#) - a gem helps generate money in Chinese Yuan.
- [stock_knight](#) - an API wrapper for Stock Fighter.
- Rails - Patch test code to ActiveSupport and Active Model: GlobalID.
- ActiveAdmin - Code for importing, adding summation row, and localization.

Self-Summary

- I'm an diligent and self-driven staff. Work hard to make jobs done, and also think hard to keep efficiency. I won the "Best Staff" award in 2014.
- Technically, my goal is to keep digging into Web development. Focusing on Ruby and Rails as a breakpoint, and learning all the other interesting topics in Web.
- Personally, always remind myself to be a humble learner, with a little patience and a lot of desire.
